

EYEGLOSS CONNECTION DEVICE

825476

Abstract

5 Disclosed is a connector for use in connecting a lens to
an earstem, comprising a main body which contains a hinge end
and a lens receiving end. The connector contains a channel ✓
for receiving a portion of the lens. The pivot end of the
channel contains a recess whereas the locking end of the
channel contains a projection. The hinge end of the
connector is attached to the earstem by a releasable pin
10 connection. The lens is connected to the connector by
inserting a lens into the channel where the lens is pivoted
at the pivot end and then the connector is snapped down to
cover over the top edge of the lens. Variations, component
parts, and a wire frame dual lens detachable component system
15 are also disclosed.
